

# Control Desk

Custom-made control desks, with fiber glass or acrylic mimic diagrams, completely equipped with annunciation equipment, are designed and manufactured by us for all types of Process Control Industries.

The mimic diagram is suitably housed on the front sloping vertical portion of the desk and the actuating pushbuttons and pilot lamps are housed on the horizontal sloping deck. Control gear equipment, like contactor, relays, and terminal blocks etc. are mounted both in the rear and in the front of the control desk.
